EDUCATION

Lawrence University

Bachelor of Arts in Computer Science, Minor in Data Science

Appleton, WI

Sep. 2023 – June 2027

TECHNICAL SKILLS

Languages: Java (FX/FXML), Python, C++, SQL, JavaScript, HTML/CSS, R, TypeScript

Frameworks: React, Node.js

Developer Tools: Git, Excel, Cursor, VS Code, Visual Studio, Raspberry Pi, Arduino, Streamdeck SDK

EXPERIENCE

Software Engineering Intern

June 2025 – August 2025

Rhombus Systems

Sacramento, CA

- Implemented a custom UI for controller-based functions in the Rhombus Console using **React**, **TypeScript** with **Gamepad API**, along with dynamic keymapping, device detection and persistent settings
- Built a plugin in the **Elgato Streamdeck** for accessing camera streams, doors, and audio devices through Rhombus APIs, shipped a BASH helper to launch HLS streams using MPV, added dependency checks, URL refresh, and structured logging
- Presented a demonstration to the engineering team, packaged and published the plugin, resolved parameter issues, and improved accessibility and operator workflows

Software Intern

July 2024 – August 2024

NETSOL Technologies

Lahore, Pakistan

- Worked with the UNITY Department where I implemented the use of AI in business analytics and marketing
- Learned the foundations of financing and marketing functionality in the company
- Observed the functionality of their software in marketing firms which included car companies such as BMW, Audi, Mercedes

Research Project

Sep 2023 – Oct 2023

Lahore University of Management Sciences (LUMS)

Lahore, Pakistan

- Cooperated with a Computer Science Professor on a research project using Google Earth Engine.
- Made use of the engine in identifying effects of climate and natural disasters in certain parts of the world at any given time
- Able to view possible aftereffects of weather conditions on the environment using existing data and precise filtering which reflect current and future environmental conditions

Research/Intern

Sep 2023 – Nov 2023

AI-Ponics pvt. Ltd

Lahore, Pakistan

- Learned how to work with Arduino boards, used **Arduino UNO** and worked with related hardware such as MBots, sonar sensors, UV sensors
- Used Arduino to introduce a new idea, Smart Agriculture, an automated farming mechanism which involved automatic usage of Arduino boards and Robotics with crop growth with the necessary programming and hardware
- Took a **Python** learning course to form a strong base on the language

PROJECTS

Datathon | Python, R

May 2025

- Created informative visual representations concerning the effect of AI on the job market, while considering wages, employment rates
- Formed a team of 3 and worked with multiple datasets, along with data wrangling, cleaning, generating new data based on old models, and other aspects of Machine Learning
- Presented in front of judges and fellow competitors for 10 minutes, secured 3rd place among 15 teams

University Course Projects | R, HTML/CSS, JavaScript

Jan 2024 – Present

- Built an interactive ShinyApp in **R** on Pokémon statistics using web scraping, data wrangling, data tidying, and data visualization to extract, process, and present insights from large datasets and websites
- Designed a multipage website using **HTML**, **CSS**, and **JavaScript** about university admissions and relevant information as a class project
